# Course Title : Java SpringBoot

**Course Duration: 16 months**

**Course Fees: INR. : Rs. 12,000      Eligibility: 10th passed**

**Prerequisites: Good Under Standing of core java and basic Standing of advance java Knowledge of SQL and databases is helpful, Basic Knowledge of HTML is helpful.**

## TOPICS

- 1.Course Introduction
- 2.Maven
- 3.JDBC (Java Database Connectivity)
- 4.Getting Started With Spring 6
- 5.Exploring Spring and SpringBoot framework
- 6.XML Config files
- 7.Working with Java base Configuration files
- 8.Moving To SpringBoot
- 9.Spring JDBC
- 10.Spring MVC(Model View Controller)
- 11.Building a Project
- 12.Spring Data JPA
- 13.Spring Data REST
- 14.Spring Security

### Session-1:Course Introduction

- Course Introduction

### Session-2: Maven

- How Maven Works, Maven in IDE, Effective Pom.xml Files Getting Maven Dependency, Start Creating Maven Projects

### Session-3: JDBC (Java Database Connectivity)

- What is JDBC, Why Need it, Steps, JDBC Connector jar, Connecting Java Code With Database, Fetching All Records, Curd Operation, Problem Statement, Prepare Statement

### Session-4: Getting Started With Spring 6

- Introduction Spring, Benefit of Use this framework, less boilerplate codes, Spring Docs, Prerequisites, IDE For Spring, IOC and DI in spring, Spring VS SpringBoot.

### Session- 5: Exploring Spring and SpringBoot framework

- SpringBoot Introduction, DI in Springboot, Maven In SpringBoot, IDE and web for creating SpringBoot Projects, Dependencies for SpringBoot Project

### Session-6:XML Configuration Files

- Spring Bean Xml Config, Object Creation, Scopes, Setter Injection, Bean Injection, Constructor Injection, Creating Interface, Autowiring, Primary Bean

### Session-7:Working with Java base Configuration files

- Spring Bean JAVA Config, Object Creation, Scopes, Setter Injection, Bean Injection, Constructor Injection, Creating Interface, Autowiring, Primary Bean, Component Scan

### Session-8: Spring JDBC

- (packages in Sprinboot, Desing Our Project package, SpringBoot Layer Flow, Service, DAO(Data access Object), Repository

### Session-9: Spring MVC(Model View Controller)

- Spring Mvc structure,Controllers for our project

### Session-10: Building a Project

- Building a full SpringBoot Project all concept implementation

### Session-11: Spring Data JPA

- ORM tool, Database Management Using JPA Repository, Annotaions, Mapping Service Repository Relation Defining

### Session-12: Spring Data REST

- Exporing REST Ful web services for java backend service, Custom API Creation, API Structure

### Session-13: Spring Security

- Secure our application with the power of spring security,full control management of springBoot Application, Role Base Authentication etc.
